

Sugar box assembly instructions

Side & back panels fit in the slot which goes around 3 of the sides.

Top panel is symmetrical there is no top or bottom.

- 1.) Place the back panel into the slot in the base with the 2 tabs at the top.
- 2.) Take one side panel and slide the tabs into the slots in the back panel and slide the side panel down until it fits in the groove in the base. Make sure the top corners of the back and side panels are flush.
- 3.) Repeat step 2 for the second side panel.
- 4.) Place the top panel in place making sure that all of the tabs fit into all of the slots.
- 5.) Drop your light socket down through the top panel, attach the clip and screw in the light bulb.

Please note that all of the panels are symmetrical and may be reversed if needed.
